**Re: Village of Loudonville, Ohio**  
**Ohio EPA Closure Certification and CAFO Termination**

Dear Ms. Mazur:

Enclosed is a copy of Ohio EPA's notification of the completion of closure activities at the Wally Road Site in Loudonville, Ohio. As indicated in Ohio EPA's letter, this area has been closed in accordance with the approved closure plan and in accordance with applicable Ohio regulations. Accordingly, the Village's obligations under the Consent Agreement and Final Order ("CAFO") have been satisfied.

As you are aware, the Village submitted a closure plan to Ohio EPA in May, 1995. The closure plan was approved by Ohio EPA on June 9, 1995 and plan activities commenced shortly thereafter. Upon completion of closure activities, the Village submitted a closure report to Ohio EPA on August 12, 1995 entitled "Documentation of Closure Verification Sampling at the Wally Road Site." The report contained certifications that it was prepared in accordance with the approved closure plan. As noted in the attached letter, Ohio EPA District Office staff completed an on-site closure inspection at the Wally Road Site and a review of documents pertaining to the site on October 11, 1995. As a result of the inspection and the review of closure documents including the closure report, Ohio EPA determined that the site was closed in accordance with the approved closure plan and the applicable regulations. See November 7, 1995 letter from Thomas E. Crepeau, Ohio EPA, to Glen Bilger, Village of Loudonville.

In accordance with Section VI of the CAFO, the Village of Loudonville has completed its obligations under Section III including full payment of the civil penalty. Accordingly, the
